

ABSTRACT OF THE DISCLOSURE

5 A facemask assembly for night vision goggles comprises a
frame assembly, a mount assembly for attachment of the night
vision goggles, an adjustment strap assembly, and a neck pad
assembly, wherein the frame assembly is generally C-shaped and
contoured to extend across the upper forehead of a user, with
each end of the generally C-shaped frame assembly extending
10 down around the outside of the eyes and to the hollow of the
cheeks of a user, below the cheek bones and above the jaw.
